

CHIRAG VEERWANI

chiraguv2006@gmail.com | [GitHub](#) | Nagpur, India

Summary

I love experimenting and exploring different scientific domains with special interest in mathematical structures and biochemistry. I have experience in applying mathematical and algorithmic concepts to various scientific domains and have been actively contributing to different exciting open source projects. I am committed to advancing knowledge through innovative problem-solving and collaboration.

Skills

Computational modeling | Algorithm development | Data analysis | Web development | Open-source contribution | Team collaboration | Machine learning

Research & Technical Experience

Undergraduate Research Assistant - Computational Chemistry

- Working with a faculty-led research group on computational modelling and algorithmic approaches to molecular and biochemical systems.
- Using different ML models to classify the molecules based on specific interest.
- Developed code and analysed data for ongoing research projects, enhancing interpretation of results.

SageMath - Computational Mathematics (Independent Study)

- Applied SageMath to enhance understanding of computational mathematics and symbolic computation.
- Executed number-theoretic and algorithmic experiments using SageMath to explore mathematical concepts.
- Engaged with SageMath development on GitHub, facilitating productive discussions with maintainers.

Algorithmic Problem Solving

- Competed in Codeforces contests to enhance skills in algorithmic problem solving and competitive programming.
- Solved selected problems on Project Euler and Branstellar to strengthen mathematical intuition and computational thinking.
- Studying foundational data structures and algorithms, including arrays, basic trees, graphs, introductory dynamic programming, and time complexity.

Hacktoberfest Contributor

- Contributed 6 merged pull requests to enhance functionality and fix bugs in open-source repositories.
- Achieved status as one of the first 10,000 contributors to fulfil Hacktoberfest requirements, demonstrating commitment to community-driven projects.

International Math Optimization Challenge (IIMOC)

- Achieved Silver Certificate in recognition of team event.
- Participated in algorithmic problem solving and implementation.

Core Team Member, Web and technical team, IR cell, IITH

- Developed responsive web applications with HTML, CSS, and JavaScript to enhance user experience.
- Monitored website performance and optimized code to improve loading times.
- Implemented front-end development using HTML, CSS, and JavaScript to create engaging and interactive web pages.

Programming And Tools

- Python, basic working experience through multiple small projects and scripts; comfortable with control flow, functions, and modular code.
- C / C++, basic familiarity, primarily through algorithmic problem solving and coursework.
- SageMath, beginner-level use for computational mathematics and mathematical experimentation.
- PyCharm, Jupyter Notebook, Google Colab
- Git
- Pandas, NumPy, Matplotlib
- Requests, BeautifulSoup, Selenium

Leadership And Activities

- Head, Dramatics and Theatre Arts Club, IITH
- Active Core Team Member, Web & Technical Team, International Relations Cell
- PR coordinator, College Cultural Festival

Education

Indian Institute of Technology Hyderabad India, 2024 - Present

B.Tech in Industrial Chemistry

- Sophomore
- **GPA:** 9.02/10

The Royal Gondwana Public School | Nagpur, India, 06/23 – 05/2024

Higer Secondary (12th grade)

- **Percentage:** 92%

Delhi Public School | Nagpur, India, 06/2021 – 05/2022

Secondary (10th grade)

- **Percentage:** 95.6%
